

*Private label manufacturing
of nail polish bulk and components*

About us

ICC srl is the only Italian company that produces nail polish and semifinished products starting from the raw material to the finished product.

ICC srl is continuously increasing market's quotation and it is now globally recognized as one of the societies which produce good quality nail polishes following all international quality standards.

ICC srl is placed in San Martino in Strada with a new productive site.

Philosophy

Company's philosophy focuses on giving to customers a product that reflects their ideas and expectations.

Formulas are now highly accurate thanks to the complete automation of the production process that wipes out human error.

Passion, creativity, technology, high quality, competitive prices and very fast delivery times: these are the success keys which make ICC srl a real reference point in the cosmetic universe made in Italy.

Research & Development

Nail polish's production starts directly from the milling of pigments and resins through a production cycle that includes the preparation of thixotropic bases, colored solutions, finished products for nail and hand care, removers, using exclusively FDA row materials.

ICC respects quality guidelines with tests and lab analysis and it follows a strictly controlled production according to the latest UE rules.

ICC laboratories work on different projects:

- Research of new ingredients (resins, pearls, pigments...) according to international rules
- New formulations of nail polishes and new products for nail care
- Creation of brand new colours

Production

- **Semifinished products** (*thixotropic bases and coloured solutions*)
