

# ANTI-SPOT CREAM FOR HANDS

**Code**  
CRM00001

**Fragrance**  
Chamomile  
The chamomile is well known for its calming and soothing properties

**Colour**  
White  
It represents light, simplicity, sun. It transmits energy, it is revitalizing, it regenerates the body and it clears the mind

**Regulations**  
to evaluate with Regulatory office

ICC research has developed a hand cream recommended for mature skins. With Japanese tangerine extract, active against senile spots, which combined with the red clover and the imperata cylindrica, can bring hydration to a dry and thin skin, combatting the signs of the time, preventing wrinkles and making the skin more toned and elastic. The combination of vegetable oils and vitamins nourish the skin to make it soft and silky.

#### Direction for use

- for over 45 women
- when you have skin spots
- when the skin is dry, toneless and thin
- to prevent and combat the signs of aging

#### How to use

Apply the cream twice a day on the back of the hand and massage until the complete absorbed. For the best results we recommend continuous treatment for at least 1 month.

#### Label

 / **EXP. DATE** PAO / Expiry date

# ANTI-SPOT CREAM FOR HANDS

## Key Ingredients

**Japanese tangerine.** The extract of the Citrus Reticulata Blaco var. Unshiu is traditionally used by the Asian women for its discolouring and lightening properties. It counteracts the production of melanin making the skin tone more uniform. In vitro tests made on rebuilt epidermis portions demonstrated:

- 32% reduction in the synthesis of melanin
- 46% reduction in the activity of the tyrosinase (the enzyme responsible for the melanin production)
- 50% reduction in the melanin quantity

In-vivo studies 20 Caucasian women aged 50 who applied the cream twice daily for 6 weeks demonstrated:

- -28% reduction in the intensity of the age spots
- 71% of the volunteers subjectively was a decrease of age spots.

**Red clover.** Trifolium Pratense is a typical herbaceous plant of the Anglo-Saxon era whose flowers are rich in isoflavones (genisteina, biochanin A, formononetina), highly antioxidant substances with oestrogenic-like effects that target mature skins, combatting signs of aging, making the skin denser, thicker, moisturized while also reducing wrinkles.

Efficacy tests in vitro demonstrated:

- +36% increase in the stimulation of the cellular metabolism
- +99% increase in the stimulation of the protein synthesis

In vivo studies on 13 volunteers demonstrated a stable and long lasting (up to 7 hours) moisturizing effect ( as evaluated by corneometric analysis);

While a study conducted on 12 volunteers with two applications for 28 days demonstrated:

- -37% reduction in wrinkle density
- 20% reduction in wrinkle depth
- -19% reduction in skin roughness

## ANTI-SPOT CREAM FOR HANDS

Moreover, the tissues recover strength, the matrix is regenerated and the skin thickness is increased (can be seen in two dimensional ultrasound images)

**Imperata cylindrica.** Imperata cylindrica is a grass native to Asia and Australia that can survive in both desert and salt flats. This characteristic is due to its high content of potassium and 3-dimethylsulfofropionate (DMSP). These substances acts on the cells osmotic regulation thus allowing the keratinocytes to store more water giving to the skin a deeper and long-lasting hydration.

**Almonds Oil.** Sweet Almond Oil is well known and appreciated for its emollient, nourishing, and soothing properties and is tolerated by even the most sensitive skins. It's rich of vitamin E, B, proteins, carbohydrates and minerals, and it's excellent in combatting the aging of skin and contributing to its renewal.

**Vitamin E.** It improves skin surface conditions because it maintains the right hydration. It also has an anti-inflammatory action and protects the skin during aging process. It has an anti-oxidant function towards free radicals that are formed on the skin surface.

**Vitamin A.** It prevents, avoids and delays the skin aging phenomena. Protecting the skin particularly in winter because it induces an epidermal thickening.

**Jjoba Oil.** Has disinfecting and anti-fungal properties. Given its special composition it lends itself very well as a cosmetic base. It has good protective and curative properties and is a great moisturiser for the skin. It is quickly absorbed and leaves skin silky and smooth. Suitable for all skin types. This high quality oil is high in Vitamin E minerals, nutrients and aids natural healing.

## ANTI-SPOT CREAM FOR HANDS

**Argan Oil.** This oil is used for its soothing, hydrating and strongly elasticizing properties. Stimulating the cell renewal, it has excellent antioxidant properties and it is frequently used in anti-age cosmetic products. The Argan Oil stimulates the intracellular oxygenation and it protects the connective tissues. Its application restores the hydrolipidic skin layer and it increases the nourishment of the cells.
