

## SOAK OFF TOP

NOV 17

**Colour**  
transparent

**Packaging**  
Nail polish 2 coated glossy or  
matt varnished bottle with un-  
lacquered brush and steel balls

Soak Off Top Coat must be applied with a thin coat after the application of the colour. That allows the sealing of the underlying layers and gives a glossy effect to the nail.

### How to use

After the application of Soak Off Gel Polish, apply a thin layer of Soak Off Top Coat and catalyse. After the complete dry you need to degrease your nails. Important: for the best result use ICC Cleanser. For further information consult the guidelines.

### Drying time

120 seconds in the UV lamp, 36 Watt

60 seconds in the LED lamp, 48 Watt

90 seconds in the LED lamp, 36 Watt

120 seconds in the LED lamp, 9 Watt

### Lasting

20 days with Soak Off Base and Soak Off Gel Polish

### Removal time

15 minutes with nail polish remover (consult the guidelines)

### Features

- Optimal sealing: Soak Off Top Coat allows an optimal sealing of the underlying layers (Soak Off Base Coat and Soak Off Gel Polish)
- High Gloss: the special composition gives a glossy effect to the nail
- Easy application: apply it like a common nail polish
- Long duration: it lasts for about 20 days and it is resistant to the chipping
- Easy removal: easy removal with the nail polish remover in 15 minutes
